6.API Integration Developer

Job Description

We are looking for an experienced API Integration Developer to join our dynamic team. The ideal candidate will have a strong background in developing and integrating APIs to facilitate seamless data exchange between various systems and applications. You will be responsible for designing, implementing, and maintaining APIs, ensuring they are secure, scalable, and efficient. Your role will involve collaborating with cross-functional teams, including software developers, system architects, and business analysts, to understand requirements and deliver solutions that meet business needs. You will also be expected to troubleshoot and resolve any issues related to API performance and functionality. The successful candidate will have a deep understanding of RESTful and SOAP APIs, as well as experience with API management tools and platforms. You should be proficient in programming languages such as Java, Python, or JavaScript, and have a good grasp of database technologies. Excellent problem-solving skills, attention to detail, and the ability to work in a fast-paced environment are essential.

Responsibilities

- Design, develop, and maintain APIs for various applications.
- Collaborate with cross-functional teams to gather and understand requirements.
- Ensure APIs are secure, scalable, and efficient.
- Troubleshoot and resolve API-related issues.
- Document API specifications and usage guidelines.
- Monitor API performance and optimize as needed.
- Implement API versioning and lifecycle management.
- Conduct code reviews and provide feedback to team members.
- Stay updated with the latest industry trends and technologies.
- Participate in agile development processes and sprints.
- Develop and maintain automated tests for APIs.
- Ensure compliance with data protection and privacy regulations.
- Provide technical support and guidance to other team members.
- Collaborate with third-party vendors for API integrations.
- Develop and maintain API management policies and procedures.

Required Skills

Technical Skills:

- Should have done live projects on API development and integration.
- Proficiency in programming languages such as Java, Python, or JavaScript.
- Experience with API management tools and platforms.
- Knowledge of database technologies such as SQL and NoSQL.
- Excellent problem-solving and analytical skills.
- Strong attention to detail and ability to work in a fast-paced environment.
- Good communication and collaboration skills.

- Experience with version control systems such as Git.
- Familiarity with cloud platforms such as AWS, Azure, or Google Cloud.
- Understanding of microservices architecture.
- Experience with CI/CD pipelines.
- Knowledge of data protection and privacy regulations.
- Ability to write clean, maintainable, and well-documented code.

Attributes:

- Professionalism with excellent time management skills.
- Ability to prioritize workload.
- Attention to details and Quick learning ability.
- Ability to work independently.
- Persuasive in both communication, presentation and facilitation skills.
- Leadership skills.
- Ability to deliver on tight schedules with minimal supervision.
- Ability to manage and influence virtual teams.
- Strong Interpersonal and problem-solving skills.

Other Specifications

- Strong theoretical and practical knowledge of object-oriented programming.
- Familiarity with Report Viewer is a plus.
- Strong knowledge of documentation) Excellent verbal and written communication.

Career Benefits

- Dynamic Working Environment
- Learning and Development
- Provident Fund
- Other benefits as per the company rules and regulations.
